

VMware vSphere Foundation: Build, Manage, and Operate [V9.0]

A five-day, instructor-led course that gives you the knowledge, skills, and abilities to deploy, configure and manage VMware vSphere Foundation.

You'll explore the architecture of vSphere Foundation and work with VCF Operations 9.0, vCenter 9.0 and ESX 9.0 – the core building blocks of today's modern data center.

KEY TOPICS YOU'LL MASTER

Deploy and configure
VMware vSphere Foundation

Work with VCF Operations 9.0,
vCenter 9.0 and ESX 9.0

Configure compute,
networking and storage

Deploy and manage
virtual machines

Work with vSphere HA,
DRS and vSAN

Understand vSphere
Kubernetes Service

Manage the lifecycle of
vSphere Foundation components

5 DAYS
INSTRUCTOR-LED TRAINING

**VMWARE VSPHERE
FOUNDATION 9.0**

**PRACTICAL SKILLS
REAL-WORLD IMPACT**

IS THIS COURSE FOR YOU?

This training is designed for IT professionals who want to build practical skills in managing VMware vSphere Foundation.

**SYSTEM
ADMINISTRATORS**

**SOLUTION
ENGINEERS**

CONSULTANTS

ARCHITECTS

**SUPPORT
PERSONNEL**

To get the most from this course, participants should have working experience and knowledge of VMware vSphere, VMware NSX and vSAN environments.

WHAT YOU'LL BE ABLE TO DO AFTER THE COURSE

BUILD

Deploy and configure vSphere Foundation and its core components with confidence.

MANAGE

Administer virtual machines, clusters, networking and storage to keep your environment running smoothly.

OPERATE

Use VCF Operations to work with metrics, reports, dashboards and alerts for better visibility.

MAINTAIN

Manage updates and the lifecycle of vCenter, ESXi hosts and other vSphere components.
