IS THIS COURSE FOR YOU?

This training is designed for IT professionals who want to build practical skills in managing Microsoft Azure services.

**AZURE
ADMINISTRATORS**

**SYSTEM
ADMINISTRATORS**

**CLOUD
ENGINEERS**

**IT
PROFESSIONALS**

**SUPPORT
SPECIALISTS**

To get the most from this course, you should have experience with Azure and familiarity with IT operations, including networking, virtualization, identity, security, and storage.

WHAT YOU'LL BE ABLE TO DO AFTER THE COURSE

**MANAGE
IDENTITIES &
GOVERNANCE**

Manage Azure AD identities, roles, policies, and subscriptions.

**CONFIGURE
VIRTUAL
NETWORKS**

Design and manage VNets, DNS, routing, and network security.

**MANAGE
STORAGE**

Implement secure, scalable storage solutions with high availability.

**DEPLOY & MANAGE
COMPUTE**

Deploy, configure, and scale VMs, containers, and App Services.

**MONITOR &
BACK UP**

Monitor resources, set alerts, and implement backup and recovery.

**CONNECT
HYBRID
ENVIRONMENTS**

Integrate Azure with on-premises environments seamlessly.
